

IN THE DRAWINGS:

In the four sheets of drawings, cancel the first two sheets (Figs. 1-3) that are substantially illegible, while retaining the second two sheets that show each of Figures 1, and 3 legibly.

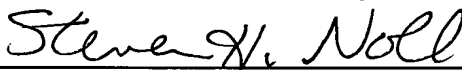

REMARKS

In the Office Action dated November 4, 2005, updating of the present specification to use patent numbers instead of serial numbers was required, which has been done. A typographical error (misspelling) in the specification also has been corrected. A more descriptive title was required, which is submitted herein.

The drawings were objected to as failing to comply with 37 C.F.R. § 1.84(p)(5), because the Examiner stated the drawings do not contain reference numeral 2. In reviewing the scanned images in the Patent and Trademark Office file for this application, it appears that two sets of drawings (each set containing Figures 1, 2 and 3) have been filed. The Patent and Trademark Office file contains four sheets of drawings. The first two sheets are virtually illegible, but the second two sheets conform in all respects to the requirements of 37 C.F.R. § 1.84, including the inclusion of reference numeral 2. By the present response, Applicants have requested that the first two (illegible) sheets be cancelled. The remaining two sheets are completely legible and, as noted above, are in full compliance with all provisions of 37 C.F.R. § 1.84.

Applicants therefore submit the application is in condition for allowance, and early reconsideration of the application is respectfully requested.
